## **DETAILED ACTION**

1. This communication is in response to Applicant's amendment filed on December 29, 2006. The rejections cited are as stated below:

### ***Response to Applicant's amendment***

2. Applicants' amendment filed on December 29, 2006 have been fully considered, and discussed in the next section below or within the following rejections are not deemed to be persuasive. Applicants' request for allowance is respectfully denied.

### ***Claim Rejections – 35 U.S.C. 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. The factual inquiries set forth in *Graham v. John Deere Co.*, 148 USPQ 459, that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

5. Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dockter et al. (US 5,854,923) in view of McDonald et al. (US 2004/0019558).

Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dockter et al. (US 5,854,923) in view of McDonald et al. (US 2004/0019558) as discussed in the previous office action mailed on June 30, 2006. Further:

Dockter teaches the use of at least one central product repository, containing consumption object profiles for a plurality of consumption objects said each of said at least one central product repository being industry relative wherein industry participants register profiles of their products and services within said product repository, each said at least one central product repository containing only entry profiles of items registered (column 2, line 51 thru column 3, line 50).

### ***Conclusion***
